## Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

### NOTICE

#### WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

## ICPSR PROCESSING NOTE FOR # 09836-0003

*Chinese Household Income Project, 1988*

- 1) **Value Labels:** In the original documentation the variables **ORA3, BA3, MR3, SUB3, AND UDA3** value labels are classified as 1 for "Yes" and 2 for "No". ICPSR processing found the actual values are 1 for "Yes" and 0 for "no".
- 2) **Variable Labels** The following grammatical error was corrected for the variable label **NHHMEM**. "# OF MEMBER IN HOUSEHOLD" was changed to "# OF MEMBERS IN HOUSEHOLD".
- 3) **Value Labels:** In the original documentation the variable **BUILD3** value labels are classified as 1 for "Household with newly built house" and 2 for "Household without newly built house". ICPSR processing found the actual values are: 0 for "Household without newly built house" 1 for "Household with newly built house."
- 4) **Value Labels:** In the original documentation the variable **LIGHT3** value labels are classified as 1 for "Have electric lighting" and 2 for "Do not have electric lighting". ICPSR processing found the actual values are: 0 for "Do not have electric lighting" and 1 for "Have electric lighting".
- 5) Due to limitations with Stata variables **LAT, LIR, LLI, LLO, I1, I3, I5, I7, HGU, HGGU, HGMU, LTR1, LTR3, STR1, STR3, RUT1, RUT3, POH1, POH3, PUE1, PUE3, WAP1, WAP3** missing values are not coded and labeled.

### **Variable Description and Frequencies**

**Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.**

**Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.**
