Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

Table 1: Distribution of Variables by Percentage of Missing Values--Rural Individual Income, Consumption, and Employment Data

Variable Name and Label (Total Cases = 37969)		Percent of Cases with Missing Values
31.0% (26 of 84 variables)		have 0% Missing Values
6.0% (5 of 84 variables)		have 0% - 1% Missing Values
2.4% (2 of 84 variables)		have 1% - 3% Missing Values
4.8% (4 of 84 variables)		have 3% - 5% Missing Values

Data and Variable Label Problems

Part 6

The materials provided by the Principal Investigators were insufficient to conclusively determine the meaning of all of the variables and values in this study. This is a list of problems or potential problems identified by the ICPSR processor. Where it is relevant, the action taken by the processor (such as marking inappropriate values as missing) is also listed.

Variable Names in Datafile	Problems Identified
